

PIGNAT Distillation Tower Dimensions

Column Internal Dimensions

This document contains the internal dimensions and geometric specifications of the PIGNAT distillation tower located at level 1 of the Liveris Building.

Tray Specifications

Tray type: Bubble Cap
Column diameter: 202.5 mm
Tray spacing: 189 mm
Bubble cap diameter: 57.1 mm
Bubble cap skirt height: 50 mm
Tray deck thickness (10 gauge): 10 mm

Side Downcomer

Side downcomer width (top): 38 mm
Side downcomer width (bottom): 38 mm

Weir Dimensions

Side weir length: 189 mm
Weir height: 10 mm
Weir length: 189 mm

Downcomer Dimensions

Downcomer clearance: 5.53 mm
Downcomer width (top): 38 mm
Downcomer width (bottom): 38 mm
Downcomer area (top): 0.059690 m²
Downcomer area (bottom): 0.059690 m²

Flow Path

Flow path length: 241 mm

Packing Specifications

Packing section diameter: 16 mm
Packed height equivalent to a theoretical plate (HETP): approximately 0.3–0.4 m
Packing dimension: 5/8 in
